MALTINE;

OR

EXTRACT OF MALTED BARLEY, WHEAT AND OATS.

MALTINE is the only perfect food remedy ever offered to the Medical Profession. It is rapidly superseding the use of Extracts of Malt, both in this country and Europe.

CHEMICAL REPORT ON MALTINE.

By R. OGDEN DOREMUS, M.D., LL.D.

PROFESSOR OF CHEMISTRY AND TOXICOLOGY, BELLEVUE HOSPITAL MEDICAL COLLEGE;
PROFESSOR OF CHEMISTRY AND PHYSICS, COLLEGE OF THE CITY OF NEW YORK.

NEW YORK, April 17th, 1879.

I have visited the works at Cresskill, on the Hudson, where MALTINE is prepared, and spent portions of two days in witnessing the chemical processes for making the same. I was particularly impressed with the thorough cleanliness observed, as well as with the completeness of the apparatus employed for accomplishing the desired result—from the first treatment of the grains, to the concentration of the liquid product by evaporation *in vacuo*. The operation is effective in extracting the whole of the nutritive constituents of the grains of malted Barley, Wheat and Oats, with but a slight residue, and is the most complete method yet devised, with which I am acquainted, for accomplishing this object.

MALTINE is superior in therapeutic and nutritive value to any Extract of Malt made from Barley alone, or to any other preparation of any one variety of grain. From a chemical and medical standpoint, I cannot commend too highly to my professional brethren this unique and compact variety of vegetable diet and remedial agent, nutritive to every tissue of the body, from bone to brain.

Respectfully,

R. OGDEN DOREMUS.

MALTINE is now in the hands of the Wholesale Trade throughout the United States.

Send for a copy of our 20 page pamphlet, containing a full description of the Manufacture of MALTINE, as well as the formulas of the different combinations.

During the past year we have received nearly one thousand letters from the Medical Profession in this country and Great Britain, referring to the therapeutic value of MALTINE: their character is indicated by several extracts which we present below.

BALTIMORE, MD., January 20th, 1879.

We take pleasure in saying in behalf of your preparations of Maltine, that they have fully come up to the measure of your representations. They have given us the greatest satisfaction. We have used them extensively to the great benefit of our patients.

DAVID STREETT, M.D., *Res. Phys., Maternité Hospital.*

GOOD SAMARITAN HOSPITAL, ST. LOUIS, MO., June 2, 1879.

I have used in private practice your preparations of Maltine, and I take pleasure in recommending them in the highest terms. My experience has been specially favorable with Maltine combin'd with Pepsin and Pancreatine, which I have found valuable in dyspepsia. The Maltine Ferrated I have prescribed in cases of general debility. I have found the Malto-Yerbine very reliable in patients suffering from debility combined with cough, depending upon catarrhal and bronchial lesions with a tendency to tuberculosis. I am happy to say that we are having favorable results from the use of Maltine in this Hospital.

T. G. COMSTOCK, M.D.

HOMŒOPATHIC TIMES, *April*, 1879.

NUTRITION.—Maltine, containing all the nutritive properties of wheat, oats, and barley, is a very important remedial agent in the treatment of many diseases. Combining pleasantly with the various nerve and blood nutrients and tonics, the physician is enabled, while administering the remedies indicated, to give at the same time a food easily digested, exceedingly palatable, and well calculated to build up the enfeebled system. We have used Maltine and its combinations with marked benefit.

HOMŒOPATHIC WORLD, *London, Eng., July 1st*, 1879.

An American company, whose works are stationed at Cresskill, on the Hudson, have produced a new food-compound which they have named Maltine. I has borne the test of careful chemical examination by those two distinguished analysts, Prof. Ogden Doremus and Prof. John Attfield, who speak of it in eulogistic terms, and consider that it is superior in its results to any preparation of any one variety of grain; therefore it now remains for the Members of the Medical Profession to test the virtues of this food at the bedside.

We predict that "Maltine" will play an important part in the dietary of chronic and wasting disease; for barley, wheat, and oats are excellent fare, extremely nourishing, and we can recommend their use, as exhibited in Maltine, with confidence.

We guarantee that MALTINE will keep perfectly in any climate, or any season of the year.

Faithfully Yours,

REED & CARNRICK, NEW YORK.

BOSTON UNIVERSITY SCHOOL OF MEDICINE.

ORGANIZED 1873.

This School has fully adopted and enforces the standard of requirements recommended by the American Institute of Homœopathy, at the Session held at Chicago, in 1870, as follows :—

First. That, unless the candidate for admission has received the degree of Bachelor of Arts, he must pass a suitable entrance examination.

Second. That a carefully graded course of instruction, covering at least three full scholastic years, shall be provided.

Third. That every student must pass a successful examination upon the work of one year before promotion to that of the next.

In addition to these conditions, the Faculty have unanimously adopted the following measures :

1. The abolition of all sex-disabilities, either in teaching or learning.
2. The requirement, as a condition of graduation, not merely that the candidate shall have studied medicine at least three full years, but that he shall have attended a reputable medical school for three years.
3. The extension of the annual lecture term, from five months to the full university year of eight months.
4. The provision of two optional *Four Years' Courses*, for those who wish to pursue their professional studies with exceptionable thoroughness, and with suitable leisure for collateral reading.
5. The restoration of the degrees of *Bachelor of Medicine* and *Bachelor of Surgery*, to be attained by those who take a four years' course at the end of the third year.

The fact that the entering class of this, the seventh year of the School, notwithstanding the increase of tuition fees and requirements, is one of the largest and best it has ever matriculated, is evidence that the profession approves its course.

For announcements, or information regarding the School, address the Dean,

PHILLIPS'

"Palatable"

COD LIVER
OIL

Combined with

PHOSPHO-NUTRITINE,

a scientific presentation of soluble wheat phosphates exactly as they exist naturally in the grain, and are needed for perfect health in the Human System.

Fact 1.—Cod Liver Oil is conceded to be the Consumptive's most valuable assistant.

Fact 2.—Many patients cannot bear the ordinary Cod Liver Oil on account of sensitiveness of the stomach.

Fact 3.—Phillips' Cod Liver Oil is the purest bland Norwegian variety, and is selected for its unusual medicinal efficacy.

Fact 4.—Phillips' Oil and Phospho-Nutritine combined is really *palatable*, and is relished and easily retained by the most delicate.

Fact 5.—This combination with *Phospho-Nutritine* imparts to the Cod Liver Oil a curative and restorative property and power which seem mysterious, but which are in reality purely scientific.

These Five Facts suggest the reasons why Phillips' Palatable Cod Liver Oil Combined with Phospho-Nutritine effects such invariably happy results in *Consumption, Emaciation, Wasting, Scrofula, Rickets, and Weaknesses and Diseases of the Lungs; also, for Nursing Mothers.*

Free from any nauseous taste or smell, miscible in water, perfectly assimilable, and containing remedial properties never before attained in medicine, this preparation is submitted with confidence to patients and physicians. Price \$1 per bottle; 6 bottles for \$5.

TO THE MEDICAL PROFESSION.

I have just introduced a new

CLINICAL THERMOMETER,

which will obviate all difficulties heretofore experienced in thermometers.

There is no danger of losing the register needle, for the simple reason it has none, but by its ingenious constriction in the contraction, which will be observed in the illustration, the mercury rises according to the temperature, and, as soon as removed from the body, the column of mercury breaks at the constriction "A" and registers the temperature, thereby making a register of the whole column. After which shake down the mercury into the bulb, or as far down as 90°, losing all signs of registering. By repeating above it will register as often as desired.

Price, \$4.00 each, in a handsome polished boxwood case, square ends to prevent rolling off. Will be sent free by mail on receipt of Post-Office order, payable at station F.

SPECIAL TO PHYSICIANS.

DR. JEROME KIDDER'S

UNEXAMPLED ELECTRO-MEDICAL APPARATUSES.

HIGHEST PREMIUM

Awarded by the American Institute for the years 1872, 1873, 1874, 1875, 1876, 1877, and 1878, and whenever exhibited in competition. The Award for 1875 was the

GOLD MEDAL,

to distinguish his apparatus as "OF THE FIRST ORDER OF IMPORTANCE" and the Award for maintained superiority by the American Institute in the years 1876, 1877, and 1878. Also the Highest Premium at the Centennial Exhibition.

All claims by others for highest premiums for those years from the American Institute and from the Centennial, for similar apparatus, are fraudulent, being made to deceive the public, as shown by Dr. Kidder's latest catalogue, giving the facts in regard thereto.

Dr. Kidder has superior

CELL BATTERIES, and GALVANO-CAUSTIC BATTERIES,

AND AN IMPROVED

POCKET INDUCTION APPARATUS

which also were awarded by the American Institute, 1877, the highest Premium, as the best yet produced.

To distinguish the genuine from the spurious, address for ILLUSTRATED CATALOGUE,

THE HAHNEMANN MEDICAL INSTITUTE OF PHILADELPHIA.

The Oldest Homœopathic College in the World !
ORGANIZED IN 1848.—1210 GRADUATES.

THE ADVANTAGES OF THIS INSTITUTE ARE AS FOLLOWS:

1. From the accumulations of nearly a third of a century, its teaching facilities have acquired a most complete character; its chemical and philosophical apparatus is ample, while its anatomical museum is unsurpassed, containing nearly five thousand specimens, and is constantly receiving valuable additions.
2. A medical library of nearly two thousand volumes, to which students have free access.
3. Unlimited clinical advantages, as offered by the Homœopathic Hospital, adjoining the College, with its daily clinics and the various free clinics of the several hospitals of the city.
4. Facilities for the practical study, not only of *Anatomy*, but of *Chemistry*, *Surgery*, *Obstetrics* and *Microscopy*. In the *Practical Surgical* Department each student is thoroughly drilled in the application of the various surgical dressings, and in the performance of the operations on the cadaver ; while in the *Obstetrical* Department he is exercised in the touch, the use of instruments, and attends cases of confinement.

5. A corps of experienced Professors, Lecturers and Demonstrators who devote themselves untiringly to the interest of the class.

The thoroughly renovated building with the remodeled Amphitheatre, in which an enlarged sky-light, and new and comfortable seats have been introduced, will be highly appreciated by the class.
